

POLARTEC®
Thermal FR®

Polartec® Thermal FR®

- Made with a unique blend of fibers for permanent flame resistance
- Will not melt or drip when exposed to flame
- Warmth without weight
- Highly breathable and quick drying

The construction of Polartec® Thermal FR® combines the performance properties of Polartec® Classic 200 fabric with permanent flame resistance properties. Like other Polartec® fabrics, the velour construction of Polartec® Thermal FR® creates air pockets that trap air and retain body heat. The fabric offers superior warmth without weight, great breathability and dry time performance, is durable and comfortable.

Polartec® Thermal FR®

The revolutionary construction of Polartec® Thermal FR® combines the performance properties of Polartec® Classic 200 fabric with permanent flame resistance. Like other Polartec® materials, the velour construction of Polartec® Thermal FR® creates air pockets that trap air and retain body heat. The fabric offers superior warmth without weight, great breathability, quick drying and is soft and comfortable.

Technical Highlights

- Made with a unique blend of fibers for permanent flame resistance
- Will not melt or drip
- Warmth without weight
- Breathable
- Dries quickly
- Durable, machine washable
- Superior after wash appearance

Thermal Transmittance/Insulation Test: The test is conducted according to ASTM D 1518. Insulation property is measured in clo values. The higher the clo value, the greater the insulation properties.

Certifications:

Fabrics are tested in the Polartec® state of the art labs and are certified to pass one or more of the following standards:

- ASTM D 6413
- ISO 14116 (EN533)
- ISO 11612 (EN531)
- NFPA 1975 / NFPA 1977 / NFPA 1951
- NFPA 70E (ASTM 1506)
- These results have been confirmed by independent testing firms.
